Form PCT/IPEA/408 (cover sheet) (march 2002)

- I. Basis of the opinion
- 1. The basis of this written opinion is the application as originally filed.
- V. Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability
- In light of the documents cited in the international search report, it is considered that the
  invention as defined in at least some of the claims does not appear to meet the
  criteria mentioned in Article 33(1) PCT, i.e. does not appear to be novel and/or to involve
  an inventive step (see international search report, in particular the documents cited X
  and/or Y and corresponding claims references).
- 2. If amendments are filed, the applicant should comply with the requirements of Rule 66.8 PCT and indicate the basis of the amendments in the documents of the application as originally filed (Article 34 (2) (b) PCT) otherwise these amendments may not be taken into consideration for the establishment of the international preliminary examination report. The attention of the applicant is drawn to the fact that if the application contains an unnecessary plurality of independent claims, no examination of any of the claims will be carried out.
- NB: Should the applicant decide to request detailed substantive examination, then an international preliminary examination report will normally be established directly. Exceptionally the examiner may draw up a second written opinion, should this be explicitly requested.
